

Agenda for Fall 2000

Integrated Querying and Reporting Service (IQRS) User Review Panel (URP) November 16th, 2000 Systems Research Applications Corporation Chantilly, Virginia

BACKGROUND

The Integrated Querying and Reporting Service (IQRS) is a web-based tool designed to provide the national health care community with an automated query and reporting interface capability to the National Practitioner Data Bank (NPDB) and the Healthcare Integrity and Protection Data Bank (HIPDB). In an effort to ensure that IQRS remains a valuable and user friendly system, the Division of Quality Assurance (DQA) NPDB-HIPDB Operations Branch has established an IQRS User Review Panel (URP).

The IQRS URP is a forum where users of the NPDB-HIPDB can gather to openly discuss and/or express their ideas about past, present and future IQRS/Data Bank operations. The IQRS URP consists of twelve Panel Members (to be determined at the Fall 2000 URP) from various entities that represent reporters, queriers, and third party users. The primary mission of the IQRS URP is to discuss issues regarding IQRS; identify new IQRS requirements; review current IQRS querying and reporting issues; and address National Practitioner Data Bank (NPDB) and Healthcare Integrity and Protection Data Bank (HIPDB) operational related issues.

GENERAL AGENDA

- **Welcoming Remarks**
- **Agenda**
- **Introductions**
- **URP Roles and Responsibilities**
 - Users
 - DQA
- **Follow-up from previous NPDB-HIPDB Workgroup (FCP 2000, 10 July 2000)**
 - Address issues from IQRS URP Kick-off session
- **Current IQRS Issues**
 - Data Bank transmission media types
 - Accepted media types for the submission of Reports and Queriers
 - Third Party Suppliers and Vendors
 - How the Data Bank will support 3rd Party Vendors
 - Input & Output
 - Web Page design and content
 - IQRS Web page contents
- **Year 2000 Accomplishments**
 - Data Bank software releases
 - IQRS Web releases

- **Year 2001 Planned Improvements**
 - System Performance Enhancements
 - Technical Enhancements
 - IQRS Web releases
 - Data Bank software releases
 - Software Change Requests (SCRs)
 - Identify and briefly discuss any outstanding SCRs
 - Generate any new SCRs, if applicable
- **Designing the New IQRS Billing Interface Screen**
 - Design Review Meeting
- **Select twelve User Review Panel Members**
 - Panel will consist of reporters, queriers, and 3rd party vendors and suppliers
- **Identified and Prioritized Requirements**
